Dear Hiring Manager,

I'd like to be considered for your Warehouse Operations Manager role in Nottingham. I've used your service as a customer and the unboxing was spot on, and I want to work somewhere that cares about that. I'm currently Operations Supervisor at Midlands Fulfilment in Leicester, where I already run the site when my manager is off.

The result I'm proudest of goes straight to the pick/pack/despatch KPIs you want this role to own. In my first year at Midlands Fulfilment I took despatch on-time from around 91% to 98.5% by changing our pick wave timings and adding a 2pm cut-off check. I did it with a team of 28 pickers and packers across two shifts, the same pattern your role covers.

I'd bring over nine years of leading warehouse teams, weekly agency booking and full-shift rotas, IOSH Managing Safely with zero RIDDORs in my time at Midlands Fulfilment, and hands-on Peoplevox WMS experience. I'm based in Leicester, happy to commute to Nottingham, and on 4 weeks' notice. I'd welcome a conversation about the role and what you need from it in the first few months.

Kind regards, Sam Patel
